Patents & Publications

Biometric-based Voting System with Multi-layer Authentication – Application No: IN202541073801, Published: Aug 2025 (Journal No. 34/2025). Invented a secure biometric-driven voting system integrating multi-layer authentication to prevent voter impersonation and improve electoral transparency.

Achievements

- KL Eats successfully transitioned from a campus project to a registered private limited company unit under Equitech Labs, now live on campus with 3 vendors, demonstrating full-stack product execution and scalable deployment.
- Contributed to open-source projects globally (9+ repositories on GitHub) and enhanced public datasets/localization via SwechaAP (OSM, Wikipedia, Weblate).
- Competitive programming: 2-star rating in CodeChef contests.
