Patents & Publications

Biometric-based Voting System with Multi-layer Authentication – Application No: IN202541073801, Published: Aug 2025 (Journal No. 34/2025). Invented a secure biometric-driven voting system integrating multi-layer authentication to prevent voter impersonation and improve electoral transparency.

Achievements

- Contributed to open-source projects globally (9+ repositories on GitHub) and enhanced public datasets/localization via SwechaAP (OSM, Wikipedia, Weblate).
- Semi-finalist in Code for Bharat Season 2 Hackathon; ranked among top 15 performers at IIITM Gwalior's CodeRush - Competitive Programming Challenge (team Code4Cause).
- Competitive programming: 2-star rating on CodeChef.
